Execute the preset function. ([F1] / [F2] keys)

[F1] [F2] Press

The operation differs depending on the preset function.
Operate while referring to the operation guide on the display.

Functions which can be preset to [F1] / [F2] keys

[FTC], [Mode], [Display Select], [Off Center], [Enhance], [Trail Time], [EBL], [VRM], [Color], [PI (Parallel Cursor)], [Alarm Mode], [ACQ], [Delete], [POB], [Target], [Other Ship], [Pulse], [Process]

By keep pressing the [F1] / [F2] key, a function assigned to each key can be selected.

Change the range. ([- RANGE +] key)

Press [+] ——→ The observation range is widened. (The image shrinks.)

Press [–] ——→ The observation range is narrowed. (The image expands.)

Adjust the STC. ([STC] knob)

STC Rotate

When rotating clockwise the [STC] knob, the effect of suppressing the reflection from sea surface becomes stronger.
When rotating counterclockwise the [STC] knob, suppressing the reflection from sea surface becomes weaker.

※ In PPI/PPI, the upper and lower screens change simultaneously.

Display the video of CCD camera. ([STC] knob)

STC Press

The video of the CCD camera is displayed.
※ The full screen and the half screen are toggled by pressing the [STC] knob.

To clear the CCD camera video, press any other key.

Start the transmission. ([STBY/TX] key)
STBY TX Press

The transmission starts, and the picture is displayed.

To stop the transmission, press the [STBY/TX] key again.

Adjust the brilliance. ([BRILL] key)

BRILL Press → LCD BRILL 10 → PANEL BRILL 10 → (arrows) Press → MENU Press

※ The [LCD BRILL] and the [PANEL BRILL] are toggled by pressing the [BRILL] key.

## Delete the heading line. ([ENT] key)

ENT Keep pressing

While pressing the [ENT] key, the heading line disappears.

When releasing the [ENT] key, the heading line appears again, and the + cursor returns to the own ship position.

Measure the distance/heading of 2-points. ([ENT] key)

Press — The cursor moves.
Press — The origin is set.
Press

The distance/direction from the origin to the + cursor is displayed.

Press the [MENU] key to finish.

Open the menu. ([MENU] key)

MENU Press

The menu is displayed.
Press the [MENU] key again to close the menu.
(For the menu, see the back side.)

## Adjust the gain. ([GAIN] knob)

GAIN Rotate

When rotating clockwise the [GAIN] knob, the gain increases.

When rotating counterclockwise the [GAIN] knob, the gain decreases.

Change the range/gain of the lower screen in the PPI/PPI. ([GAIN] knob)

GAIN Press → SUB-SCREEN RANGE 5.0 → SUB-SCREEN GAIN 5.0 → (arrows) Press → MENU Press

※ The [SUB-SCREEN RANGE] and the [SUB-SCREEN GAIN] are toggled by pressing the [GAIN] knob.

## Turn on/off the power. ([BRILL] key)

Turn on the power.
BRILL Press

Turn off the power.
BRILL
Turn off the power. Keep pressing the key for 3 seconds.

How to operate the Menu

MENU → Open the menu → Select the menu name → Select the setting item → Change the setting content

MENU — Close the menu

1st time: The menu returns to the set item.
2nd time: The menu returns to the menu name.

MENU → Close the menu

Functions of Echo Setting Menu

ECHO	FTC	3	①
TRAILS	MODE	H UP RM	②
DISPLAY	DISPLAY SELECT	PPI	③
ALARM	OFF CENTER	OFF	④
AIS	ENHANCE	1	⑤
ATA	PROCESS	OFF	⑥
NEXT	PULSE	RESO-P PRI	⑦

① Change the setting of FTC.
   The bigger numerical value brings bigger effect.
② Change the display mode.
   Select from [H UP RM], [N UP RM], [N UP TM], [C UP RM], [C UP TM], and [WPT UP RM].
③ Set the display configuration.
④ Set the center position of the display.
   The set position becomes the center of the display (own ship's position).
⑤ The enlarged image is displayed.
   The bigger numerical value expands target more greatly.
⑥ Stabilize the unstable targets by signal-processing the picture.
⑦ Change the pulse width.
   [RESO-P PRI] : Suitable for searching in the place where targets are crowded.
   [GAIN PRI]   : Suitable for searching small targets.

Functions of Trail Setting Menu

ECHO	TRAIL MODE	TRUE	①
TRAILS	TRAIL TIME	3MIN	②
DISPLAY	TRAILSHAPE	STANDARD	③
ALARM	TRAIL LEVEL	7	④
AIS			
ATA			
NEXT			

① Set the display method of the trail.
   [REL]   : Display the difference of the relative target position as a trail.
   [TRUE] : Display the trail of the course and speed of a moving target irrespective of own ship's motion.
   ※ To display the true trail, entering the data of heading, ship speed and latitude/longitude is required.
② Set a time to display the trail.
③ Set the shape of the trail.
   [STANDARD] : Even if time goes, the shape of the trail remains unchanged.
   [DECREASE] : As time goes, the trail becomes narrower.
④ Set the signal level of the trail.
   When increasing the numerical value, only targets that return strong reflections are displayed.

Functions of Display Setting Menu

ECHO	EBL	ON	①
TRAILS	VRM	ON	②
DISPLAY	COLOR	STANDARD	③
ALARM	CURSOR SHAPE	STANDARD	④
AIS	PI	OFF	⑤
ATA	PI NUMBER	7	⑥
NEXT	BRG TRUE/REL	REL	⑦
	VECTOR	6MIN	⑧
	VECTOR TRUE/REL	TRUE	⑨

① Measure the bearing from own ship to a target.
   After selecting [ON] and pressing the [▶] key, change the bearing with the [◀] and [▶] keys.
② Measure the distance from own ship to a target.
   After selecting [ON] and pressing the [▶] key, change the distance with the [▲] and [▼] keys.
③ Change the color of entire display.
④ Set the shape of the + cursor.
⑤ Display straight lines which are parallel with own ship set as a standard.
⑥ Set a number of parallel lines.
⑦ Change the + cursor and the bearing display mode of the EBL.
   [TRUE] : The true north points 0°.
   [REL]   : The heading points 0°.
⑧ Display the bearings and speeds of own ship and other ships as vector lines.
⑨ Set the mode (TRUE/RELATIVE) of the vector line.
